George Anderson DNA Study My "working" theory

Isle of Wight There is no known DNA to tie this family together George Anderson wife Elizabeth arrrived 1695 left 1710...then Meherrin River, NC vanished Elizabeth Anderson, widow died 1733 leaves will sons: James Anderson Occoneechee Neck, NC Carolus Anderson (no sons) daughter: James Anderson Elizabeth Pitman first noted 1716 vanished 1721 The son of Elizabeth Pitman is William Anderson of Edgecombe County, NC he died 1789 He is a bastard child of an unknown BRANTLEY male. The entire line of his sons I suspect, but cannot prove, is BRANTLEY DNA. that this James had a son (George d. 1757) A DNA sample purported to link to this man was provided by Paul Anderson

https://www.familytreedna.com/groups/andersondna/about

(Paul is deceased)

Paul Anderson provided basic (12) DNA results in the early 2000s.

I have BigY results on the above website...(again, my results will be BRANTLEY DNA.

I am a blithering idiot when it comes to analyzing DNA.
I draw maps.

I am an old dog that refuses to learn to analyze DNA. Do not attempt to ask me technical DNA questions.
